Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on October 9, 2007 has been entered.

Invocation of 35 USC § 112, Sixth Paragraph

2. The following is a quotation of the sixth paragraph of 35 U.S.C. 112:

An element in a claim for a combination may be expressed as a means or step for performing a specified function without the recital of structure, material, or acts in support thereof, and such claim shall be construed to cover the corresponding structure, material, or acts described in the specification and equivalents thereof.

The following is a quotation of MPEP 2181(I):

A claim limitation will be presumed to invoke 35 U.S.C. 112, sixth paragraph, if it meets the following 3-prong analysis: (A) the claim limitations must use the phrase "means for" or "step for;" (B) the "means for" or "step for" must be modified by functional language; and (C) the phrase "means for" or "step for" must not be modified by sufficient structure, material, or acts for achieving the specified function.

The claimed "signal processing means," "parameter storage means," "reproduction time computing means" and "optical disc reproduction means" limitations of claim 1 and the claimed "reproduction time displaying means" limitation of claim 2 use the phrase "means for" modified by functional language and not modified by sufficient structure for achieving the specified function. Accordingly, the "means for" limitations of claims 1 and 2 are presumed to invoke 35 U.S.C. 112, sixth paragraph.

"If the specification defines what is meant by [a means-plus-function claim] limitation for the purposes of the claimed invention, the examiner should interpret the limitation as having that meaning" (MPEP 2182). The specification defines the claimed "signal processing means" as signal processing circuit 110 of Fig. 1 (Page 6, lines 28-29). The specification defines the

claimed "parameter storage means" as DRAM 111 of Fig. 1 (Page 6, line 35). The specification defines the claimed "reproduction time computing means" and "optical disc reproduction means" as ROM 112 and CPU 113 collectively (Page 6, line 36-Page 7, line 4). The specification defines the claimed "reproduction time displaying means" as reproduction time displaying circuit 300 of Fig. 3 (Page 9, lines 10-16). Accordingly, those limitations have been interpreted as having the meanings identified above.

Allowable Subject Matter

3. Claims 1-4 are allowed. Claims 1-4 contain allowable subject matter for the reasons specified in Applicant's Remarks filed October 9, 2007 and April 5, 2007.
